

ELITE GOLDEN PUPS

HEALTH GUARANTEE

1. Parents are OFA tested to minimize the likelihood of adverse hereditary conditions.
2. The puppy will be examined by a licensed veterinarian.
3. The puppy will be dewormed every two weeks.
4. The puppy will be vaccinated for:
 - Canine Distemper Virus (CDV)
 - Infectious Canine Hepatitis (CAV-1)
 - Canine Adenovirus Type 2 (CAV-2)
 - Canine Parainfluenza (CPIV)
 - Canine Parvovirus (CPV)
5. The Seller will provide an AKC limited (not for breeding) registration application to the buyer, or provide AKC certificates of the parent dogs.
6. The puppy will be microchipped for identification.
7. The Buyer agrees that within five (5) days of taking possession of the puppy he/she may have it examined by a licensed veterinarian. If that examination reveals the puppy has any significant medical problems (conditions that affect the life span or long-term health of the puppy, or that require major surgery or constant medication, not including accidents or communicable diseases that occur after the seller takes possession of the puppy), the buyer may return the puppy within three (3) days of the examination. Upon receipt of the puppy, the seller will reimburse the purchase price within ten (10) days. If the buyer chooses to pay for treatment without returning the puppy, the seller is released from any obligation to reimburse the buyer.
8. The seller is offering a two (2) year guarantee against genetic or congenital issues. In the event that such an issue may arise, the buyer is required to provide proof by sending documents from a licensed veterinarian. Once genetic or congenital has been confirmed, the Seller will provide a replacement puppy from a future litter.
